Journal of Engineering Mathematics

Contents of Volume 25 (1991)

Vol. 25, No. 1, February 1991

G.C. Hocking: Critical withdrawal from a two-layer fluid through a line sink 1

W.W. Hackborn: Separation in a two-dimensional Stokes flow inside an elliptic cylinder 13

P. Luchini: Solution of a coupled creeping-flow problem by the Wiener–Hopf method 23

J.S. Yu and W.S. Chang: Dispersion of solute in wall-bounded parallel shear flows 31

A.J. Hermans: Slowly moving hull forms in short waves 63

T. Miloh: On the oblique water-entry problem of a rigid sphere 77

S. Godts and R.Kh. Zeytounian: Flows with variable viscosity: an asymptotic model 93

Vol. 25, No. 2, May 1991

R.J. Gargaro: Convection in a shallow laterally heated cavity with conducting boundaries 99

E.B.B. Watson and D.V. Evans: Resonant frequencies of a fluid in containers with internal bodies 115

S.H. Smith: The development of geostrophic flow within a split cylinder 137

S.R. Breit: The potential of a Rankine source between parallel planes and in a rectangular cylinder 151

J.H. Merkin, I. Pop and T. Mahmood: Mixed convection on a vertical surface with a prescribed heat flux: the solution for small and large Prandtl numbers 165

J.R. King: Integral results for nonlinear diffusion equations 191

Vol. 25 No. 3 August 1991

P.G. Kalitzova-Kurteva and Z.D. Zapryanov: Boundary layer growth on two circular cylinders 207

T. Lewiński: On displacement-based theories of sandwich plates with soft core 223

J.W. van der Burg, J.G.M. Kuerten and P.J. Zandbergen: Multigrid and Runge-Kutta time stepping applied to the uniformly non-oscillatory scheme for conservation laws 243

S.K. Wilson: A mathematical model for the initial stages of fluid impact in the presence of a cushioning fluid layer 265

J.M. Hill and D.L. Hill: On the derivation of first integrals for similarity solutions 287

Vol. 25, No. 4, November 1991

O.P. Chandna, I. Husain and F. Labropulu: Finitely conducting compressible aligned magnetofluiddynamic parallel flows 301

F. Oliveri: Painlevé analysis and similarity solutions of Burgers' equation with variable coefficients 317

K. Kirkkopru and N. Riley: Secondary separation from a slender wing 329

P.H. van Lieshout and A.A.F. van de Ven: A variational approach to the magneto-elastic buckling problem of an arbitrary number of superconducting beams 353

W.H.H. Banks and M.B. Zaturska: Buoyancy-driven flow between parallel plane vertical walls 375
